

From nuclear to clean power: 2nd Annual Power Plant Innovation Forum

On March 7 – 8 2017, Aloft Kuala Lumpur Sentral will host the region's leading plant managers, environmental engineers, R&D managers to discuss the latest technologies to increase operational efficiency, sustainability and business continuity.

The world struggles with shortage of energy, and thus several initiatives to build more power plants and expansion of existing infrastructure have been made. Home to approximately 60 % of the world's population, Asia is also undergoing critical changes and is in urgent need to modernize & overhaul the existing power infrastructure.

This HRDF Claimable event is the perfect opportunity to meet utilities, government bodies and solution providers in one place to answer the fundamental questions by putting focus on the latest undergoing projects, as well as understand energy's blueprint, develop new strategies and improve operations and maintenance.

Supported by the Sustainable Energy Authority Malaysia and with keynotes delivered by YB Dato' Sri Dr. Stephen Rundi Anak Utom, Minister of Public Utilities, Sarawak and Ybhg. Dato' Seri Ir Dr Zaini bin Ujang Secretary General, Ministry of Energy, Green Technology and Water, the event will also feature numerous case studies by Sarawak Energy, Malaysia Biomass Industries, Tawau Green Energy and more

More confirmed speakers include senior representatives from Sharjah Electricity and Water Authority, University Teknologi PETRONAS, Public Utilities Commission of Sri Lanka, Nuclear Agency Malaysia and many more.
