

Sifted Summit 2024: Igniting Europe's Startup Revival

Sifted Summit, Europe's leading event for the startup ecosystem, returns to London on October 2-3, 2024, bringing together 3,000+ founders, operators, investors and industry leaders for two days of inspiration, collaboration and dealmaking.

European tech has taken a beating — but startups are bouncing back. Sifted Summit 2024 will explore how Europe's leading founders, startup operators and investors are recalibrating. The event will explore how startups are adapting to the new economic landscape, the opportunities emerging in key sectors and the role of investors in driving growth.

The event will feature a diverse lineup of over 200 speakers, including leading figures like Miki Kuusi (Cofounder and CEO, Wolt), Tania Boler (President and Founder, Elvie), and Anne Boden (Founder, Starling Bank). They will share their insights on the latest trends, challenges, and opportunities in the European tech landscape.

Outside of the main conference, a series of official side events will take place around the city from October 1-3 2024. These events will be organised by community partners and sponsors, offering attendees a chance to delve deeper into specific topics, network with like-minded individuals and explore the vibrant London tech scene.

John Thornhill, Co-Founder, Sifted: "When we launched Sifted our aim was to give a louder voice to a new generation of brilliant European entrepreneurs. The Sifted Summit has now become the stage for many of the most interesting conversations between Europe's brightest minds. It's also where connections are made between the most innovative companies and investors, as we build the future of European tech together."

Bruce Macfarlane, CEO, Sifted: "European tech has been through a challenging time but it has accelerated the adoption of new technologies and fuelled a wave of entrepreneurial spirit. Europe has a unique opportunity to become a global leader in innovation. Sifted Summit provides the connections, resources and inspiration needed to help make this vision a reality."
