

Modern Buildings Summit Returns to Abu Dhabi on 11th September 2025

The Modern Buildings Summit, The region's premier event for innovation in architecture, construction, and sustainable urban development will take place on 11th September 2025 in Abu Dhabi.

Following the success of its recent edition in Ras Al Khaimah, this highly anticipated gathering will bring together over 200 senior professionals, including architects, developers, consultants, and technology providers, to explore the latest trends shaping the built environment.

This summit will focus on:

- **Smart Building Technologies:** Harnessing automation, digital twins, and intelligent systems to enhance performance and efficiency.
- **Sustainable Design & Materials:** Solutions driving net-zero targets and reducing the environmental footprint of new projects.
- **Future-Ready Infrastructure:** Innovations in EV infrastructure, retrofitting strategies, and resilient urban planning.

Delegates will benefit from expert-led keynotes, technical presentations, and panel discussions featuring regional and international thought leaders. A dedicated exhibition area will showcase cutting-edge products, technologies, and services redefining how modern buildings are designed and operated.
