Lithium Latin America Congress 2026

Date: TBA

Organizer: Vostock Capital

[Official Website](#)

For the seventh consecutive year, "[Lithium Latin America Congress and Exhibition 2026](#)" will gather together international professionals of the industrial lithium producing enterprises, regulatory authorities, government, technology and equipment suppliers, and investors across Latin America, the US, Canada, and Europe.

[Request the brochure](#)

Congress Highlights:

- **+ 400 senior executives from the lithium industry** will gather to discuss the most pressing issues in the sector.
- **+20 presentations** with firsthand information from leading companies in the sector.
- **Global lithium market status. Growth prospects of the lithium market in Latin America.** Challenges and opportunities for lithium production and export in Argentina, Bolivia, Chile, Brazil, and other countries.
- **Technical innovations to solve the main market needs.** New companies and technologies such as equipment are crucial points for the industry's development.
- **New and existing lithium projects in Latin America.** Main lithium projects in Latin America: status and updates.
- **Roundtable: open dialogue between suppliers and end customers.** End customer opinions and philosophies for medium and long-term planning.
- **The role of lithium in the energy transition.** Regulatory framework for lithium exploitation and battery production.
- **Research and technological advances, status of the lithium industry in Latin America. Products and services.** Sector leaders share their experiences and practical cases of lithium projects.
- **Environmental and social impacts of lithium mining, and how to mitigate it.** Best practices applied by lithium operators to protect the environment and communities.
- **Technical Roundtable: from exploration to effective extraction.** Excellent opportunity to discuss all technical issues and questions related to the construction and operation of lithium extraction plants.
